

### **As writers we will be...**

Learning to adapt our writing to suit three different text types. These will be cinquains, information texts and fantasy portal stories. These will allow the children to practise writing a form of poetry and understand the structural features of non-fiction texts. They will then be able to develop their creative writing using different descriptive techniques and grammatical features.

### **As mathematicians we will be...**

Developing our understanding of decimals looking at ordering and comparing them and making wholes out of tenths and hundredths, We will also be looking at money, time, shape and statistics. The most important part of maths this term will be times tables and our times tables test.

### **In MFL we will be...**

Learning how to say different dates including our birthdays. We will also learn about family, clothes, different French stories and food project. We will continue to practise our pronunciation and retention of vocabulary.

### **As Historians we will be...**

Our local history in Plymouth specifically focusing on the Mayflower, the journey they took and the passengers on board. We will be considering why this is important to us and how Plymouth was significant in this.

### **As designers we will be...**

Creating mood lighting following a design brief such as a torch or a night light.

### **As artists we will be...**

Creating still life drawings based on our favourite things.

## **Summer Term 2025 Year Four**

### **In PSHE we will be...**

Completing the unit called 'Relationships' and 'Changing me' This will enable us to build on our previous learning about friendships and understand how we change as we get older.

### **As Geographers we will be...**

Learning about 'Earthquakes and Settlements'. We will consider what causes earthquakes, what they are, where they happen in the world and the impacts that they have.

### **As scientists we will be...**

Learning about electricity and properties of materials. We will learn what electricity is and how this is made. We will also learn about materials and what makes them and how these vary.

### **In Computing we will be...**

Looking at a unit called coding where we will get to create little programmes using code. We will also complete a short unit We will then complete an animations unit as well.

### **As religious explorers we will be...**

Looking at a unit called 'How have people and events in history shaped Islamic diversity?' We will also complete a unit called 'How have religion and belief shaped our local area?'

### **As musicians we will be...**

Learning how to play the guitar with our specialist music teacher. We will continue to think about the cords and play these confidently along to songs. We will also begin to think about creating our own music using the guitars and in small groups.

### **As athletes we will be...**

Learning about athletics and kwik cricket. These will both hopefully be done outside due to the nicer weather and will allow us to develop our sports skills both in independent sports and in team sports. We will focus on different athletic skills and focus on becoming better in these skills each week.
